Ant Design

Bootstrap

Firebase

Figma

Postman

HTML

GitHub

## LANGUAGES

Turkish

English

## EDUCATION

Computer Engineering

Tekirdağ Namık Kemal University

2020 - 2024

## EMPLOYMENT

### **Pinsoft - IT Solutions and Consulting**

Oct 2024 - Jun 2024

Front-end Developer Intern

I worked as a team lead on the front-end development of a comprehensive bus ticket sales website. My team and I designed and coded the customer and admin panel interfaces, integrating the relevant APIs to communicate with the backend. Throughout this process, we utilized Angular, Next.js, TypeScript, and Tailwind.

### **InfiniCode**

Sep 2023 - Jan 2024

Front-end Developer

I played a pivotal role in the development of an automated RSVP application, overseeing the majority of the project. I was responsible for the design, coding, and seamless integration with Firebase. This robust application, built using React, Tailwind, and Firebase, offers an efficient and user-friendly experience for managing event responses.

### **Ectaro**

Dec 2023 - Jan 2024

Front-end Developer

I contributed to the development of a factory's web application, creating various pages and functionalities using Ant Design and Next.js.

I meticulously coded an e-commerce site for gaming chairs from scratch, adhering to a perfect pixel implementation based on a Figma design. Additionally, I established the relevant functionalities and operational principles.

### **Tozlu.com**

Sep 2023 - Nov 2023

Front-end Developer

I developed the interface for Tozlu.com, a popular clothing site in Turkey, from scratch using Bootstrap and pure JavaScript. I worked closely with Tozlu.com's software lead throughout the project to ensure seamless progress.
